

Colorado Hemp Oil (Cannabidiol- CBD)

What is CBD?

- Chemical compound extracted from the cannabis sativa plant
- Belongs to a class of molecules called cannabinoids
- Legal dietary supplement
- Has many medicinal applications
- Counteracts the negative impacts created by THC- psychoactive chemical found in cannabis
- Binds to special receptors (CB1 & CB2) found on cells in your body- has a higher affinity for CB2 and weakly interacts with CB1
- The cell receptors make up the endocannabinoid system

Human Endocannabinoid System

- Network of cell receptors with many functions
- Physiological system involved in establishing and maintaining human health
- Found all over your body: brain, skin, connective tissue, glands, immune cells, digestive tract & reproductive organs.
- Plays an important role in maintaining homeostasis

How is CBD different from Marijuana?

- Non-psychoactive and does not result in feelings of euphoria
- Does not cause intoxication since it only has trace amounts of THC
- THC has a strong affinity for CB1- found in high concentrations in the brain, which causes the psychoactive effects
- Healing properties without side effects
- Helps with varying ailments
- May cause slight fatigue with overuse

Nanoemulsion Liposomal Delivery System:

- Efficient compound delivery
- Phospholipid encapsulation helps to avoid product degradation by digestive processes
- Increases absorption of the hemp oil 5-10 fold
- Small vesicles allow for fast absorption beginning at the mouth
- Highest grade ingredients
- 3x the amount of hemp oil uptake in the blood at half the dose compared to other products

Medical use of CBD:

Immune Function	Inflammation Reduction	Energy Intake & Storage
Appetite Control & Cravings	Nutrient Transport	Cellular Communication
Emotional Balance	Reproduction	Pain Sensation
Sleep	Bone Growth	Memory

Conditions responsive to CBD:

Cancer	Diabetes	Lupus
Motor Disorders	Nicotine Addiction	Parkinson's Disease
Chronic & Neuropathic Pain	Obsessive Compulsive Disorder	Osteoporosis
Epileptic Disorders	Schizophrenia & Psychotic Disorders	Depression & Anxiety
Psoriasis	PTSD	Fibromyalgia
Glaucoma	Atherosclerosis	
Multiple Sclerosis	Keratosiis	Rheumatoid Arthritis
